

KLOVE has been a great use to me for local and international news with a Christian point of view. They only play positive and encouraging music. I used to have road rage while listening to other stations that played a lot of negative music. With KLOVE, I have become more patient with others. KLOVE saves lives everyday. They have a 1-800 number that you or anyone can call if you are thinking of suicide or if you just need a prayer or to talk to someone confidentially. They have been a great service to my community (Memphis) and especially in my home. They announce free concerts and events that are going on in our community as well. I'm sure that there are other programming that will be effected like radio talk shows that focus on current events. Please don't do something that can take away what our community needs. KLOVE is listener supported, and if that alone doesn't support the fact that America wants them, just call any of the millions of listeners, and supporters around the world and ask them. Ask those who's lives have been changed for the better. Ask those who are still alive today because of the life changing power of hearing God's word and the service that is provided for helping those in a suicidal situation. There are plenty to ask since over 80,000 listeners have been saved since January 2004, not to mention the millions saved in years past.
